CONTRIBUTIONS TO THE IOPC FUNDS

INTRODUCTION

The 1992 Fund is financed by contributions levied on any person (company or other entity) who has received in one calendar year more than 150 000 tonnes of crude oil and heavy fuel oil (contributing oil) in a State Party to the 1992 Fund Convention. Those persons who pay contributions are referred to as contributors.

The contributions system for the Supplementary Fund is similar to the 1992 Fund in that it is also financed by contributors who have received more than 150 000 tonnes of contributing oil in a calendar year. However, there is a minimum tonnage of one million tonnes per year for each Member State of the Supplementary Fund. The Member State is responsible for paying contributions of up to one million tonnes if there are no contributors in their State, or if the total amount of oil received by contributors in their State is less than one million tonnes.

BASIS OF CONTRIBUTIONS

The levy of contributions is based on reports of oil receipts in respect of individual contributors. Member States are required to communicate every year to the Director of the 1992 Fund and the Supplementary Fund the name and address of any person in that State who is liable to pay contributions, as well as the quantity of contributing oil received by any such person. This applies whether the receiver of oil is a government authority, a State-owned company or a private company.

Oil is counted for contribution purposes each time it is received at a port or terminal installation in a Member State after carriage by sea. The term **received** refers to receipt into tankage or storage immediately after carriage by sea. The place of loading is irrelevant; the oil may be imported from abroad, carried from another port in the same State or transported by ship from an offshore production rig. Oil that is received for transhipment to another port or received for further transport by pipeline is also considered received for contribution purposes. In addition, oil that is discharged in a port or terminal installation after carriage by sea in a non-Member State of the 1992 Fund and subsequently transported by land to a Member State is considered received for contribution purposes. The term **received** does not include ship-to-ship transfers of oil.

PAYMENT OF CONTRIBUTIONS

Annual contributions are levied by the 1992 Fund to meet the anticipated payments of compensation and administrative expenses during the coming year. The amount levied is decided each year by the governing bodies—the 1992 Fund Assembly and Supplementary Fund Assembly. The 1992 Fund has a General Fund which covers expenses for administration and working capital set by the Assembly. The General Fund also

covers compensation payments and claims-related expenditure up to a limit of SDR 4 million^{<1>} per incident. Contributions to the General Fund are based on the oil received in the preceding calendar year and are payable by 1 March in the following year. For example, the 2023 General Fund contributions were based on the oil received in 2022 and were payable by 1 March 2024.

If an incident gives rise to substantial payments of compensation and claims-related expenditure, a **Major Claims Fund** is established to cover payments in excess of the amount payable from the General Fund (SDR 4 million). Contributions to a Major Claims Fund are based on the oil received by contributors in the year preceding the incident. For example, for an incident that occurred in 2023, contributions to the Major Claims Fund for that incident are based on the oil received in 2022 in any State that was a Member on the date of the incident.

Each contributor pays an amount per tonne of contributing oil they received. The amount per tonne is calculated by dividing the total contributions to be levied by the total amount of oil received in all Member States in the relevant calendar year.

The relevant governing body decides the total amount to be levied in contributions for a given calendar year, and a system of deferred invoicing exists whereby they can decide to invoice a portion for payment by 1 March in the following year, with the remaining amount, or a part thereof, to be invoiced later in the year if necessary.

1992 Fund

The Director issues an invoice to each contributor following the decision taken by the governing bodies to levy annual contributions. The contributions are payable by the individual contributors directly to the 1992 Fund. The State will only be responsible for paying the contributions if it has voluntarily accepted such responsibility under Article 14 of the 1992 Fund Convention.

Payments made by the 1992 Fund in respect of claims for compensation for oil pollution damage may vary considerably from year to year, resulting in fluctuating levels of contributions and amounts per tonne of contributing oil.

Supplementary Fund

The Supplementary Fund has a General Fund which only covers administrative expenses. A Claims Fund will be set up for any incident for which the Supplementary Fund has to pay compensation.

REIMBURSEMENT TO CONTRIBUTORS

When all claims and expenses for a Major Claims Fund incident have been settled, the balance of that Major Claims Fund, including any interest earned, is reimbursed to the contributors. Reimbursements are paid to the contributors in the same proportion as their total contribution to that Major Claims Fund, i.e. based on the oil they received in the year preceding the incident.

MOST RECENT CONTRIBUTIONS

General Fund

At its November 2023 session, the 1992 Fund Assembly decided to levy 2023 contributions to the General Fund of £10 million, based on oil received in 2022 and payable by 1 March 2024. Since the total oil received in 2022, both reported and estimated, totalled 1 456 235 979 tonnes, contributions of £0.0068670 per tonne were levied to the General Fund.

Major Claims Funds

At its November 2023 session, the 1992 Fund Assembly also decided to levy contributions to the *Bow Jubail* Major Claims Fund of £20 million payable by 1 March 2024 and to levy contributions to the *Princess Empress* Major Claims Fund of £10 million payable by 1 March 2024. The 1992 Fund Assembly further decided not to levy 2023 contributions in respect of the *Prestige, Alfa I, Agia Zoni II, Nesa R3* and Incident in Israel Major Claims Funds.

With regard to the *Bow Jubail* Major Claims Fund, the total quantity of oil received in 2017, both reported and estimated, totalled 1 601 507 641 tonnes, so contributions of £0.0124882 per tonne will be levied. With regard to the *Princess Empress* Major Claims Fund, the total quantity of oil received in 2022, both reported and estimated, totalled 1 456 235 979 tonnes, so contributions of £0.0068670 will be levied.

Annual contributions to the General Fund—Supplementary Fund

The following table sets out the contributions levied in 2006, the first year for which contributions were levied to meet the Supplementary Fund's administrative expenses:

Annual contributions	Oil year	Date due	Total levy (£)	Levy per tonne of contributing oil (£)
2006	2005	01.03.2007	1 400 000	0.0017223<2>

In April 2017, the Supplementary Fund Assembly decided to reimburse £830 000 to contributors in the 19 Member States who paid the 2006 contributions to the General Fund. They also decided to levy contributions of £1.5 million to contributors in the current 31 Member States, as set out in the following table.

Annual contributions	Oil year	Date due	Total levy (£)	Levy per tonne of contributing oil (£)

<2> Capping

Under Article 18 of the Supplementary Fund Protocol, total annual contributions in a Member State could not exceed 20% of total contributions for that calendar year. When contributions were levied to the General Fund in 2006, Japan reported 31.64% of the total contributing oil. A capping levy was, therefore, applied to reduce Japan's total contributions to 20% of the total and the difference was redistributed amongst contributors in other Member States. Capping was also applied to the reimbursement of the 2006 contributions to ensure that the reimbursement to contributors was in the same proportion to the contributions they paid. Article 18 ceased to have effect from 2010 when the total tonnage reported to the Supplementary Fund surpassed 1 000 million tonnes. It is no longer applied to Supplementary Fund contributions.

Details on the 2006 capping deduction and capping levy are set out below:

	Levy per tonne £	
Capping deduction per tonne for contributors in Japan	-0.0006334	
Capping levy per tonne for contributors in other States	0.0002931	

At its April 2017 session, the Supplementary Fund Assembly decided to reimburse £830 000 from the General Fund on 1 March 2018 to those contributors in the 19 Member States who contributed to the 2006 levy to the Supplementary Fund. It was noted that a capping levy had been applied to the 2006 levy of contributions in accordance with Article 18.1 (Transitional provisions) of the Supplementary Fund Protocol and the capping levy would also be applied to the reimbursement of those contributions. The capping deduction and additional reimbursement are set out below:
