CONTRIBUTING OIL RECEIVED IN THE CALENDAR YEAR 2023

(as reported by 31 December 2024)

SUPPLEMENTARY FUND

The Supplementary Fund is financed in the same way as the 1992 Fund, however, a minimum annual tonnage of one million tonnes applies to Member States. When contributions are levied to the Supplementary Fund, Member States that received no contributing oil are required to pay contributions as if they had received one million tonnes of oil. If the Member State has contributors that received less than one million tonnes of contributing oil in total, the State is required to pay contributions to make up the difference between the amount of oil the contributors received, and one million tonnes. In 2023, eight States received less than one million tonnes of oil and would have been invoiced if contributions had been levied.

At its November 2024 session, the Supplementary Fund Assembly decided not to levy 2023 contributions, since there had been no incidents involving the Supplementary Fund.

All Member States of the Supplementary Fund have fully complied with their treaty obligations, submitting oil reports and ensuring full payment of all contributions. In the event that any issues with reporting or the payment of contributions were to arise, the Director would be able to action Supplementary Fund Assembly Resolutions N°s 3 and 5, which were adopted in April 2016 and November 2023 respectively, to encourage States to ensure their obligations are fulfilled.

The quantities of contributing oil received in the calendar year 2023 (due by 30 April 2024 and as reported by 31 December 2024) in Member States which were Members of the Supplementary Fund on 31 December 2024 are listed in the table below:
