## CONTRIBUTING OIL RECEIVED IN THE CALENDAR YEAR 2024

*(as reported by 31 December 2025)*

### SUPPLEMENTARY FUND

The Supplementary Fund is financed in the same way as the 1992 Fund, however, a minimum annual tonnage of one million tonnes applies to Member States. When contributions are levied to the Supplementary Fund, Member States that received no contributing oil are required to pay contributions as if they had received one million tonnes of oil. If the Member State has contributors that received less than one million tonnes of contributing oil in total, the State is required to pay contributions to make up the difference between the amount of oil the contributors received, and one million tonnes. In 2024, ten States received less than one million tonnes of oil and would have been invoiced if contributions had been levied.

At its November 2025 session, the Supplementary Fund Assembly decided not to levy 2024 contributions, since there had been no incidents involving the Supplementary Fund.

As at 31 December 2025, Congo had not submitted oil reports for 2024. All other Member States, have completed the submission of oil reports.

In the event that any issues with reporting or the payment of contributions were to arise, the Director would be able to apply Supplementary Fund Assembly Resolution No3 and Resolution No5, which were adopted in April 2016 and November 2023 respectively, to encourage States to ensure their obligations are fulfilled.

The quantities of contributing oil received in the calendar year 2024 (due by 30 April 2025 and as reported by 31 December 2025) in States which were Members of the Supplementary Fund on 31 December 2025 are listed in the table below:
